

Services

We at Ryan & Murray Ltd. understand that a successful building process is founded on a working partnership involving client, designer and builder.

Design

For prospective clients with their own plans already we are happy to provide a firm quotation to build.

For those seeking design assistance, we offer the full range of design expertise through our close relationships with many of Auckland's best architects, engineers and interior design practices. Our experience has been that the early involvement of the builder in the design process allows many potential problems and budget disappointments to be avoided. Similarly the benefits of working with good designers and engineers are obvious.

Construction

We offer the combined resources and experience of 30 years building practice and all the benefits and assurance that only a Registered Master Builder can provide. All our work is backed by a seven year Master Builders Guarantee. We have been early participants in the development of solid masonry and natural stone construction and lead the way in earth brick/adobe construction techniques. As many of our 'lifestyle' homes are situated far from the maddening crowds of suburbia our building crews have gained considerable expertise and experience with difficult jobs on difficult or remote sites.

We like to say that: "If it can be designed, then we can build it!"
